

ENVIRONMENTAL MANAGEMENT POLICY

Statement of Intent

We fully recognise, both corporately and as individual members of the company, our responsibility to protect the environment. Through continual improvement in our systems, processes and materials we aim to minimise the impact on the environment of our work and ensure that, as a minimum, we fulfil our compliance requirements with all relevant environmental legislation and approved codes of practice.

Our Environmental Policy provides the framework for setting and reviewing environmental objectives and targets. It actively encourages the education and training of our employees in environmental issues and the environmental effects of their activities and provides assurance to all stakeholders of our commitment to demonstrable environmental management.

The following key objectives act to serve as guidelines in the implementation of our Environmental Policy:

- Protect the environment, prevent pollution, reduce emission's and waste on site
- Raise awareness, encourage participation and train employees in environmental matters
- We are committed to enhancing our environmental performance
- Encourage similar environmental standards from our suppliers and subcontractors
- Assist customers to use products and services in an environmentally sensitive way
- Use timber from sustainable (managed) forests (FSC or similar)
- Procedures to minimise noise disturbance to others
- Develop use of renewable energy resources and reduce carbon emissions
- Promote safe and health buildings for our clients
- Encourage and facilitate a healthy working environment for our staff

Progress monitoring and review of environmental performance will be undertaken on a regular basis. Changes to legislation and improvements to this policy will be communicated to all users of our environmental management system.

William Logan

Managing Director
