Benenden School

Education / Refurbishment and External Works

Key Features:

- Internal refurbishment to several boarding houses
- Upgrades to access roads and pedestrian paths
- Finishes to an exemplary private school standard

During the Summer of 2022, we were appointed by Benenden School to provide much needed internal and external refurbishment to their estate. Critically, this was to be completed prior to the return of all students and staff for the start of the new academic year.

Delivering to Private School Standards

Benenden School is regarded as one of the leading boarding schools in Britain. Founded in 1923, they provide the highest standards of academic study for over 500 girls aged 11-18.

Owing to the prestige of the school, our management of CDP, construction installation and element commissioning was targeted towards achieving the exemplary quality levels required by this esteemed client. With this in mind, we successfully managed the coordination of works to:

- Echyngham Boarding House: Refurbishment of the first and second floor bathrooms, including access for services alterations.
- Guldeford Boarding House: Refurbishment of the Matron's first floor office, also including services alterations.
- Medway Boarding House: Upgrades to the basement.
- Medway and Marshall Boarding House: Refurbishment of corridor ceilings and roof space.
- Norris Boarding House: Alterations to the first floor bathroom, dormitory and staff accommodation, with services alterations.
- External access roads and pedestrian pathways refurnished at the front of Echyngham House.

Safeguarding the Occupied School Environment

Although the work was programmed to commence in the Summer Holiday, our methodology was considerate of the many members of school staff still working in the buildings, as well as the residential students continuing to occupy several of the Boarding Houses we were working in.

Client:	Benenden School
Project Value:	£600,000
Programme Duration:	10 weeks
