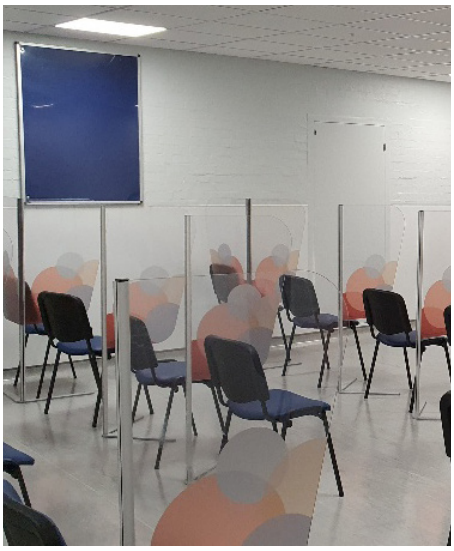
Emergency Department

Healthcare / Refurbishment

Key Features:

- Wide scope of works through several phases
- Fit-out of mental health facilities
- Delivered during COVID-19 pandemic

Delivered during the height of the COVID-19 pandemic, this project comprised the alteration, adaption and streamlining of nearly 20 areas within the existing Emergency department.



To ensure minimal disruption to the critical services of this department, works were agreed to be carried out in several zones and through timed phases.

Works provided new patient bedding, staff offices, meeting rooms, reconfigured gym areas, changing rooms with lockers, washrooms, reception area, waiting rooms, paediatric seating zone and emergency department streaming pods.

Mental Health Facilities

As part of our works, we provided several treatment areas. This included procuring, installing and commissioning several secure observation rooms. Through this element of works, we ensured strict compliance with relevant HBN parameters, including HBN 03-01 Adult Acute Mental Health. Moreover, appreciated the anti-ligature, anti-pick mastic and anti-tamper provisions needed in the procurement of doors, IPS and other items as necessary.

COVID-19 Safeguards

Owing to the pandemic and the frontline NHS setting, we implemented a robust COVID-19 strategy. Following agreement with the Trust, this included:

- All hoardings tested by Trust Infection Control to establish airtightness.
- Face coverings were mandatory within the hospital.
- Social distancing maintained with a programme accommodating this..
- Social distancing and infection control during material deliveries.
- Paperless transactions executed onsite; no physical signing of documents.
- Suitable PPE was utilised at all times.
- Post operation cleaning was completed.

Client:	Royal Free London NHS Foundation Trust
Project Value:	£2,200,000
Programme Duration:	59 weeks
Architect:	Ansell & Bailey
